## Curriers Organize For The Coming Season

The annual meeting of the Crossfield Curling Club was held on Tuesday evening in the Oliver Cafe. Nearly all the old sports were present and a few new faces were in evidence.

The election of officers turned out to be an easy affair, all of last years officers being re-elected.

President, G. Williams  
Vice-President, A. A. Halliday.

Sec-Treas., Chas. Purvis  
Executive Committee—Pres.

Vice - President, Secretary, Jas. Williams, Ivor Lewis, A. H. Miller, W. H. Miller.

Ice Committee—Ed. Meyers, L. McRory, Gordon Purvis.

The financial statement showed \$50.00 in outstanding bills, and \$15.00 in outstanding dues.

The fees for the season were set at \$10.00.

Considerable discussion arose regarding the substitution of players and the following arrangement was submitted:

A skip substituting must play lead and the rink be penalized 3 points. A third man penalizes the rink 2 points. A second man substituting penalizes the rink 1 point. A player of equal rank may play in his own position without any penalty. In the event of a skip being absent the third man takes the helm and the players move up in position.

The election of skips resulted as follows:

A. H. Miller, L. McRory, Ed. Meyers, W. H. Miller, Glen Williams, Jas. Williams, M. Thomas, F. Purvis, W. Stralo, H. McCaskill.

It was decided to try and arrange for an open night in each week which would be devoted to visiting rinks and challenges.

## OBITUARY

It is with regret that we have to announce the death of Ernest Archer which occurred on Monday last at his residence just west of town. Deceased was 51 years of age and leaves a wife and young daughter. He was born in Wellingborough, North Hampshire, England, and came to Crossfield in August, 1929.

The deceased was taken ill on Wednesday of last week when septic pneumonia set in. Dr. Whillans was called in on Thursday, but held out no hope from the beginning and as stated Mr. Archer passed away.

The funeral service was held from the Anglican Church on Thursday. Rev. A. D. Currie officiating. Interment was made in the Crossfield cemetery.

The pallbearers; Messrs A. Melting, D. Gerlitz, W. Cross, W. Brandon, H. Long, S. Walker.

The Chronicle extends its sincere sympathy to those who are left behind.

## MATRIMONIAL

BELL-BURRELL

A wedding of interest to many in Crossfield, took place at St. Paul's Anglican Church, Kamloops on November 3rd, when Ida Evelyn Burrell, became the bride of James Bell of Mar. B. C. The Rev. Axon officiated.

The bride was attired in egg-shell chiffon, with a wedding veil caught in place with orange blossoms. The young couple were supported by Mr. and Mrs. Boake of Kelowna, B. C.

DALTON-HOPPER

At the home of Mr. and Mrs. Frank Hopper on Saturday evening, November 8th. their daughter Elsie Grace was united in marriage to Francis Stanley Dalton. Rev. H. Young officiated. They will reside at Calgary.

## Chicken Supper and Dance a Success

The annual chicken supper and dance of the C. W. L. of St. Frances church, which affair always proves one of the most popular of such gatherings each fall, was truly a worthy success.

From six o'clock until eight thirty a steady stream of men, women, and children wended their way to the U.F.A. hall, to enjoy a most elegant chicken supper.

The dance following was attended by a large crowd, many from Calgary and outside points in attendance. The music by "The Carstairs Merry Makers" was exceptionally good and a real good time was had by all.

During the evening a draw was made for a young general purpose horse which had been donated to the C.W.L. by Angus Robertson. Mr. A. T. Kleopfer of Calgary held the lucky ticket No 298.

Taken as a whole the affair was truly a huge success, and the greatest credit is due to the ladies for the large amount of hard work which must have been put into it to achieve the full result attained. The handsome sum of \$124.75 was realized from the supper and dance, and the draw for the horse brought in \$45.00.

## Board of Trade Members

Remember the Board of Trade meeting and luncheon in the Oliver Cafe on Monday evening at 6.45.

Important business will be discussed. Several members of the Calgary Board of Trade will be present.

Make it a point to attend this meeting.

## Bazaar on Saturday, November 15th.

The Women's Guild are holding a bazaar, and sale of home cooking and tea from 3 to 6 on Saturday, Nov. 15 at the U. F. A. Hall. A good chance to buy Christmas gifts.

## CHAUTAUQUA

While we cannot see "eye to eye" in every detail with Chautauqu, taking it by and large we are for it stronger than ever.

In times of depression, do we see its true value. We must have entertainment of a wholesome, uplifting nature that will allow us to relax from the high tension caused by the present financial stringency, which is making itself felt universally.

A few dollars admits the whole family to six programs that are chosen to suit every temperament—youth and old—and we do not hesitate to say that the money thus spent, is not a luxury, but an investment that returns big dividends.

It has been remarked that "Chautauqua takes too much money out of our district." Our contention however is that this is not so, on the contrary, instead of taking a trip to the city to obtain entertainment and do some unnecessary shopping on the side, a great many people will attend Chautauquus do their shopping right at home, foregoing their trip to the city entirely, and the extra volume of business transacted at home during Chautauqua week, more than offsets the amount of money that goes out.

Chautauqua brings to our door programmes that are clean and refreshing, that should be an inspiration to our youth; it helps the older folk to "carry on" in face of the grave difficulties which are being faced today, and the cost is so small that it should be an important item in the budget of every family.

## Notice

On and after 1st. November  
our price for Coal will be

\$7.25 per ton off car

\$7.75 " " out of shed.

Terms : CASH

We have cut our price as low as ever  
possible to try to offset the low price  
of farm produce.

## What Have You Learned About Life?

A world-wide organization of men recently conducted a contest, requesting letters on the subject: "What Have I Learned About Life?" Numerous replies were received, and the writer of this column feels that he cannot do better this week than pass on one of the prize winning essays. It is brief, and to the point, and reads:

"I used to drive my father's car on the country roads. While bouncing along over the rough ruts on the right side, the left part of the road always appeared more inviting; but once on that side I inevitably found it just as rough or worse.

This is the first lesson I have learned about the roadway of life. The other side is deceiving. The boy longs to be a man, and the old man glorifies the golden days of his youth. The poor yearn to be rich, while a larger income constantly calls for more expense. But the successes and gains of life are not in the future or the past, nor in the other man's back yard. They lie within our own reach at the present time and in the present conditions. Life has lined us up for an even start.

The second thing I have learned about life is that God hasn't finished the job. We rejoice in the accomplishments of science, religion and social relationships, but yet in the crowded ways of life we find strife, unbrotherliness, political corruption and the curse of a maladjusted industrial order. Civilization is in its infancy, and its growth will depend on us of the present generation. There are still new worlds for men to conquer.

It doesn't take long for one to learn that there is no getting by in the long run of life. Being born into the world with this or that fortune or pedigree does not guarantee that one shall have a sturdy character and a personality that shines like the morning sun. Regardless of where a man starts in life those things of lasting value, education, religion, business power, a strong and virile physique and a happy home life are obtained only by long hours of patient and arduous toil and self-discipline which alone are the harbingers of a radiant and masterful personality. There are no sales and charge accounts in the market places of life. The price of the best is constant.

Finally I have learned that there is enough happiness in life to go around. No man is cut off from his heritage of happiness even though it be interpreted with hardships and sorrows. To be able to see the vision of life's task in spite of the cramped quarters of a small job; to find outlet of soul and character in stooping to help a brother while persecuted by others; to rejoice in the exaltation of personality while crushed in the wheels of industrialism; and to be happy in a great and thrilling quest with the fresh dawn of each immortal day—this is the major lesson of life.

## Shipping Asbestos To Japan

About Eighty Per Cent. Used In Product In Canada

"The market in Japan for asbestos in lump, powder and fibre, as well as in packing and other forms is increasing year by year owing to the expansion of industrial plants using this material and to the great variety of uses to which asbestos products are being put in everyday life," according to James A. Langley, commercial secretary to the Canadian Legation at Tokyo, Japan, in an article in the October issue of the Commercial Intelligence Journal.

About 80 per cent. of the asbestos used in Japan comes directly from Canada, a small percentage from Russia and the balance through one or two English concerns interested

in the African asbestos fields. The demand for asbestos powder and fibre runs to about 12,000 tons.

## Will Teach First Aid

Art To Be Taught At Balfour Technical School In Regina

The art of first aid is to be taught in specially established classes at Balfour Technical School in Regina. The school is co-operating in this work with the St. John Ambulance Association and a statement issued at Ottawa by the association said this new departure illustrated the increased recognition being given the necessity for knowledge of first aid in industry.

The step is being taken by Balfour school with a view to enabling employers in Saskatchewan to comply with the regulations of the Workmen's Compensation Board which requires that employers having 25 or more persons on their pay rolls maintain a first aid room in charge of a competent student of the art.

## Making Trial Shipment Of Western Cattle

Prominent Ranchers Send High Class Animals To Old Country

Jack Byers, Sr., livestock promoter, attached to the Dominion Department of Agriculture, has taken a trainload of range steers, two, three and four years old which were contributed by a number of prominent ranchers of Saskatchewan and Alberta, as a trial shipment of high-class cattle to the Old Country markets.

The shipment is being supervised by the Federal Department of Agriculture from loading to market. Mr. Byers sailed from Montreal to Manchester on October 30.

## Veteran Government Worker

Walter Todd Has Served In Civil Service For More Than Half a Century

Walter Todd, for more than half a century clerk of committees and private bills for the House of Commons, died at Ottawa recently in his 74th year. His illness had been of brief duration.

The 57 years Mr. Todd spent as a government worker made him, in point of continuous service, one of the oldest members of the civil service. He succeeded his father to the position of clerk of committees in 1874.

In addition to the coincidence that father and son gave many years to the same post in the service of their country, one other peculiar incident stood out similarly in both their lives. In 1848 when the Parliament buildings, then situated in Montreal, were fired by an angry mob during the agitation which followed introduction of the "Rebellion Losses" Bill, Mr. Todd's father cut the portrait of Queen Victoria from its frame while the structure about him was in flames.

In 1916 when the Parliament buildings at Ottawa again went up in flames, Walter Todd cut the same portrait of her late majesty from its frame and once again the canvas was saved by a Todd.

## Newspaper Convention

Provincial Meeting In B.C. Of Journalists On Daily and Weekly

A provincial convention of the men and women who are engaged in the editorial departments of the daily and weekly press of British Columbia, the first of its kind in Canada, is planned for a late week-end in February, preliminary arrangements having been made at a meeting of the provincial executive committee of the B.C. Institute of Journalists, held in Vancouver.

The convention will coincide with the annual dinner of the Vancouver branch, which will act as host to the out of town members who are expected to assemble from all parts of the province.

## Woman's Fortitude

Forces Herself To Smile Through Pain

"I never seem to find time to rest," says many an overworked housewife. Under smiles and forced cheerfulness she conceals weariness and nervous depression; headaches and backache. Often she is in real pain, but still refuses to give up. This very fortitude is apt to be her undoing. If she continues to neglect the signals of distress she will sooner or later suffer a serious breakdown.

A noted doctor has stated that nine-tenths of the ills of womanhood are due to poor blood. That anemia is the cause of the low spirits, the poor appetite and palpitation that make life a burden for so many. There is no need, however, for women to suffer in this way. All the miseries of anemia can be banished by taking Dr. Williams' Pink Pills. These pills create an abundance of new, rich, red blood and this new blood will bring strength and vitality to nervous, overworked women. The pills are sold by all medicine dealers or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

## Industry May Develop

Horse meat has never been considered a delicacy among Canadians, but frequent inquiries have come from Europe as to Canada's ability to provide such food. Already a temporary abattoir has been provided in Calgary. If the demand, which comes from Rotterdam, continues it is expected that permanent plants will be built and an effort made to completely supply it.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

Before a man can wake up and find himself famous he must first wake up and find himself.

## Chest Colds

Minor's Liniment is recommended in cases of bronchitis, irregularity. Rub it on the affected parts, or inhale it as suggested.

## Would Cancel War Debts

President Beatty Of The C.P.R. Tells People Of U.S. That Cancellation Would Bring Back Prosperity

"It is not for me or any other citizen of the British Empire to discuss either publicly or privately the propriety or otherwise of war debt cancellations," E. W. Beatty, K.C., president of the Canadian Pacific Railway Company, said in a speech at Philadelphia, N.C. "But it is not surprising that men of great vision in the United States have reached the conclusion that if they were removed, industry would be stimulated, trade would expand and prosperity would return."

The railway president was addressing a banquet of the eighth annual convention of the American Institute of Steel Construction. He surveyed the amity existing between the United States and Canada, outlined the importance of railroading to the two countries and spoke of business depression as the reason for that situation in Canada. The interruption to the marketing of Canadian grain, the direct and indirect results of the stock market collapse of last fall and the somewhat unsatisfactory present conditions respecting the newspaper industry, were the principal contributing causes to Canada's present depression, Mr. Beatty felt.

The United States Mr. Beatty said, had reached a population of 75,000,000 before its export business equalled the amount of that of Canada in 1927. "It speaks well for a country's progress when for less than 170,000,000 people it can produce this result," he said.

## Alberta Gas Contains

Very Little Helium

Report States Extraction Is Not Considered Economically Feasible

Alberta gas contains an element of helium but evidently not of such quantity as would make its extraction economically feasible it has been stated at the Interior Department.

About 1917, during the war, some interesting experiments were conducted at Calgary by Prof. J. C. McLennan, of Toronto University. It was found that whereas, in Texas gas, there is a content of 3 per cent. helium, the Alberta content did not exceed a third of that figure. No commercial helium was extracted at all.

The problem was one of economic feasibility, and as stated this was not demonstrated. Soon afterwards the war closed and the experiments ceased though the results were made available to the research council. As to some extent the possible developments are still being explored.

## Uses Of Volcanic Dust

Volcanic dust is mainly used in the manufacture of cleansers, scouring powders, and abrasive soaps, but lately, outside Canada, there has been an increasing demand for its use as an admixture in cement and plasters. Volcanic dust beds up to thirty feet thick are being worked near Swift Current, Saskatchewan. There are other beds in British Columbia.

## Should Be Settled

A fussy old woman inquired of a black porter the time of the train to Chicago. She then went to a white man and asked him. The negro went to the white man afterwards, and said with a smile, "Perhaps she will believe it now she has got it in black and white."

The finest diamonds come from the neighborhood of fresh-water rivers.

## Dairy Production Increases

Increasing Demand For Dairy Stock In Prairie Provinces

"Statistics of dairy production at the present time indicate that there is an appreciable increase in milk and cream production all over Canada at the present time," observes Dr. J. A. Ruddle, Dairy Commissioner of the Dominion Department of Agriculture. With respect to butter production Ontario and Alberta show a 15 per cent. increase for the first six months of the production year. Cheese production, of which 97 per cent. is centered in Ontario and Quebec, was 30,000 boxes behind last year as at October 11. One of the interesting features in the dairy industry at the present time is the increasing demand for dairy stock in the Prairie Provinces.

## Two Sections In Grain Show

Grown should bear in mind that there are really two sections in the wheat classes of the World's Grain Show, Regina, in 1932. One section of five classes, calls for an exhibit of fifty pounds, the other for an exhibit of ten bushels. The smaller exhibit will, of course, admit of much more careful selection than will the larger. The ten-bushel sample may be prepared with cleanliness, but this should be done very thoroughly.

## Postage Stamp Changes

New Color To Be Adopted In Printing New Issue

Fall styles in postage stamps will show a radical change in color scheme. Within a month, or sooner, if present stocks are exhausted, a new issue of stamps up to the eight cent denomination will be released by Canada's Post Office Department. Basic colors will be changed in conformity with regulations of the Universal Postal Union, of which Canada is a member.

The one cent stamp will change its "dress" from orange to green; the two cent stamp will be red in place of green as at present; the mauve five cent stamp will make way for one of blue and the eight cent postal carrier will give up its blue color for a modish orange.

## New System Of Lighting

Dummy or imitation "windows" are providing a superior kind of illumination for new office buildings in London, England. Concealed electric bulbs that simulate daylight are in the windows, which are constructed so as to resemble real windows in size and shape. Tests have proved that work is easier under this light than in the light provided by the customary indirect glow from overhead bowls.

## Felt Tired Out All Day

Could Not Sleep at Night

Mrs. Aldamond Lalonde, 2481 St. James St., Montreal, Que., writes:—"After a spell of the grippe I was left very nervous, and felt tired out all day, and could not sleep at night. I was also troubled with my heart and did not feel at all like working. I was told about Milburn's Heart and Nerve Pills and after taking four boxes I was completely relieved of my trouble, and can recommend your pills to everyone."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

**MILBURN'S HEART NERVE PILLS**

## EXPENDITURES FOR RELIEF ARE GIVEN APPROVAL

Ottawa, Ont.—Expenditures totaling more than \$37,000,000 for public works and undertakings throughout the Dominion to relieve unemployment have been given final approval. Announcement to this effect was made by Hon. Gideon D. Robertson, Minister of Labor.

Work proposals put forward by various municipalities and provinces, which the Dominion Government has endorsed, aggregate approximately \$14,000,000. A number of these undertakings are already under way. Construction and improvement programs for the Canadian Pacific and Canadian National Railways total \$22,653,650. Expenditure through the grade crossing fund is authorized to the amount of \$500,000.

Expenditures approved for the different provinces are as follows:

Ontario	\$10,069,867
British Columbia	1,857,850
Saskatchewan	1,292,600
New Brunswick	406,300
Manitoba	294,676
Prince Edward Island	180,000
Nova Scotia	109,100
Yukon	5,000
C. P. R.	11,514,000
C. N. R. (Approx.)	11,550,650
Grade Crossing Fund	500,000
<b>Total</b>	<b>\$37,128,442</b>

Proposed works and undertakings for Quebec and Alberta, with estimated expenditures, are expected to be received from these provinces and their municipalities shortly, Senator Robertson declared.

Upon their receipt they will be placed before cabinet for approval as has been done in the case of other provinces. Other proposed expenditures in Ontario, British Columbia, Saskatchewan, New Brunswick, Manitoba, Prince Edward Island, Nova Scotia and the Yukon Territory will be submitted from time to time for Dominion approval, and announcement of these undertakings will follow.

The prime minister's promise to the Canadian people that prompt action to relieve unemployment would follow the general election in July last has been implemented since Mr. Bennett took office on August 10. Senator Robertson declared. After a survey of accomplishments in this regard to date, the minister expressed warm appreciation of the manner in which all interested had heartily co-operated in hastening the creation of employment opportunities as rapidly as could reasonably be expected.

"Steps are being taken," Senator Robertson stated, "to encourage employers to make use of the employment service offices so that unemployed workmen registered therein may be promptly made available for and acquainted with work going forward. A complete list of localities and extent of expenditures for relief works thereunder in every part of Canada will be given to the public press from time to time so that the public and particularly unemployed men will have knowledge of where and when opportunities may be found. In every agreement with every province the Federal Government's fair wage and eight-hour-day policies have been inserted, so that exploitation of labor through working unnecessarily long hours is prevented and the maintenance of current reasonable rates are provided for."

**Wheat Shows High Protein**  
Calgary, Alberta.—The earlier threshed grain from the southern part of Alberta showed remarkably high protein, according to tests made from many points, it is reported by the Alberta Wheat Pool. Samples for Heaketh and Idleside, showed a protein content of 19 per cent, while many other points supplied samples of wheat which tested from 15 to 18 protein content.

**Pays Tribute To Grenfell**  
London, England.—The Prince of Wales paid a tribute to the work of Sir Wilfred Grenfell in a letter which was read by the Lord Mayor of London recently at a meeting of the Grenfell Association. The letter read: "There is no doubt that Sir Wilfred is carrying on splendid work in a territory rapidly becoming an economic unit of great potential value to Newfoundland and the Empire."

**Manitoba Birds For Eastern Show**  
Brandon, Man.—A poultry exhibit of considerable size will be sent to the Toronto Royal Show this month by the province of Manitoba. John Windover of this city stated that more than 50 birds would be shipped east and that turkeys will comprise a large portion of the exhibit.

W. N. U. 1863

## Freemen Of City Of London

Prime Ministers Of Canada, Australia and New Zealand Are Honored  
London, England.—In the old Guildhall, with its five centuries of stirring history, the Prime Ministers of Canada, Australia and New Zealand became freemen of the City of London. Premiers R. B. Bennett, J. H. Scullin, and G. W. Forbes, were declared in the ancient formula to be "men of good name and fame."

"They do not desire the freedom of the city whereby they will defend the King or this city of any of its rights, customs and privileges," so ran the declaration of the comparators, "they will pay their scot, bear their lot, and so they all say."

Sir Adrian Pollock, city chamberlain, introduced the new freemen. He said Premier R. B. Bennett "has not belied his reputation for plain speaking and sincerity to get things done, which admirable attributes are the more conspicuous on account of his well-known hereditary and passionate loyalty to the empire."

Premier Bennett declared he felt the honor was conferred upon himself personally, but as an honor to the Dominion of Canada. "I shall tell my fellow-Canadians, when I return, of the high regard you hold for them in this old city and of the deep concern ever manifested in their progress and prosperity," Premier Bennett said.

Premier Bennett referred to the Imperial Conference. "Of this great conference in which we are now engaged," he continued, "I can only say that every delegate, whether from the homeland or the overseas dominions, is actuated by an earnest desire to promote the well-being and prosperity of this great empire, this commonwealth of nations of which we are trustees."

## Not Exempt From Taxation

C.N.R. Pays Over Eighteen Million In Three Years

Toronto, Ont.—Replying to the statement that the Canadian National Railway fed on the public exchequer and was exempt from taxation, Sir Henry Thornton, chairman and president of the system, told members of the Toronto Board of Trade Club, that from 1926 to 1929 the railway had paid in federal, provincial and municipal taxes \$18,700,000. This amount, he said, was only \$3,000,000 less than paid out by the Canadian Pacific Railway.

The \$3,000,000 less can be explained by the fact that Maritime railways are under a different arrangement.

## Carried Out Father's Wish

Kingford-Smith Scatters Ashes Of His Father Over Waters Of Pacific

Sydney, N.S.W.—Wing Commander Charles Kingford-Smith, using the aeroplane in which he made his last memorable flight from England to Australia, scattered the ashes of his father over the waters of the Pacific Ocean, which had witnessed his first notable triumph in the air.

On his death bed, William Kingford-Smith, father of the aviator, expressed a wish that his ashes be cast to the winds over the Pacific, and his famous son thus performed his last duty to his dead sire. The elder Kingford-Smith died November 2.

## Shock Causes Death

Southsea, England.—Major David Thomson, 68, only brother of Lord Thomson, the air minister who lost his life in the R-101 disaster, died November 2. Physicians attributed his death to shock as a result of the tragedy.

## May Visit French Capital

London, England.—Premier R. B. Bennett, of Canada, will probably visit Paris, after the Imperial Conference has concluded, to discuss trade matters with the French government.

## Labor Secures Majority

Premier Ramsay MacDonald Wins Through First Division  
London, England.—A majority of only 81 votes carried the Labor Government of Premier Ramsay MacDonald safely through the first important division of the current parliamentary session.

This was regarded a crucial test, for the balloting was only on a motion by the Conservative party to amend the Speech in reply to the Address from the Throne. The amendment was defeated by 281 votes to 250.

The Speech from the Throne has been under bitter attack for two days, the Conservatives regretting the failure of the Laborites to propose any adequate measures to deal with the crisis in the industrial, agricultural and commercial fields or to check the growth of unemployment.

Liberals decided to abstain from voting on the amendment. As a matter of fact, five Liberals, including Sir John Simon, voted against the government, but they were almost counter-balanced by four members of the same party who stood by the administration.

The left wing Laborites stood by Premier MacDonald.

## DOMINION-WIDE AIR SERVICE TO BE INAUGURATED

Winnipeg, Man.—Negotiations are now in progress for the formation of the Dominion-wide air service, in which the Canadian National and Canadian Pacific Railways will participate, according to word received here recently. Preliminary plans for an all-Canada service were discussed some months ago, and since that time negotiations, now nearing completion, have been under way with the railways and eastern aerial companies.

James A. Richardson, Winnipeg, financier, and president of the Western Canada Airways, who will be the majority stockholder in the organization, to be known as the Aviation Corporation of Canada, is at present in the east completing negotiations for the new air development.

The Aviation Corporation of Canada will have under its control the Western Canada Airways, the Canadian Transcontinental Airways, the Canadian Airways and other companies, providing an air service from coast to coast. The railways will both be financially interested in the organization, which, it is stated, has the sanction of the Federal Government, although it will have no financial stake in the concern.

Development of train and air schedules to provide speedy transcontinental service across the Dominion is forecast.

There will be no public financing of the corporation in the immediate future, it is understood.

## Franco-Italian Naval Difference

United States Ambassador Is Optimistic After Conference

Rome, Italy.—Hugh S. Gibson, United States ambassador to Belgium, has returned to Geneva apparently optimistic after a series of conferences with Italian government heads looking toward a settlement of the Franco-Italian naval difference.

He did not talk for publication about his conversations with Premier Mussolini and Foreign Minister Grandi, but he left behind an impression that negotiations between France and Italy will be undertaken at the League of Nations preparatory disarmament commission sessions with more likelihood of success than would have been the case before his visit to Rome.

## Wheat Expert

DR. W. W. SWANSON

Professor of Economics, University of Saskatchewan, Saskatoon, who is at present in London with the Canadian delegation attending the Imperial Economic Conference. An outstanding authority on wheat, Professor Swanson is pursuing the difficult problems involved in the marketing of Canada's crops, concerning which so many despatches have been cabled to Canadian newspapers.

## For Improved Motor Cars

Increase In Speed, Comfort, Safety and Cheapness Is Predicted

London, England.—Motor cars of the future will have fewer parts—hundreds of fewer parts—while taxicabs and buses may have their engines at the rear, according to a prediction made here recently by Sir Herbert Austin, prominent manufacturer, while addressing the Institution of Automobile Engineers. He added that all transport would increase in speed, comfort, safety and cheapness.

"Why we put up with the present archaic type of vehicle in London streets," Sir Herbert said, "is difficult to understand." The weight of road vehicles could be reduced with advantage, Sir Herbert declared, and a design was wanted for a 15 horse power closed car to weigh not more than 14 hundred weight.

## Investigate Indian Conditions

Minister Of The Interior To Study Situation In The West

Ottawa, Ont.—In order to examine at first hand conditions on Indian reserves in the prairie provinces, H. T. G. Murphy, Minister of Interior and Indian Affairs, will journey to the west the end of this week. While the minister's plans have not been completed, visits are contemplated to a number of reserves in the neighborhood of Regina, Sask., and Calgary, Alberta.

According to officials of the department, reports from Indian agents throughout the country indicate the plight of Indians is serious.

With winter coming on, every effort is being made to find ways to relieve the distress which is considered inevitable.

## Planning Two Great Planes

Berlin, Germany.—The aeroplane that startled and surprised the world, the Dornier DO-X, is to have two sister ships if information received through aviation circles proves correct. It is reported that the Dornier Company is at work building two new planes the size of the DO-X and that they are expected to be completed in May, 1931.

## Aviator Receives Decoration

Copenhagen, Denmark.—Captain Wolfgang Von Gronau, the German transatlantic flyer, received from King Christian a decoration in recognition of his crossing the Atlantic to New York by way of Greenland. The flyer said the route will be the highway of trans-Atlantic traffic in the future.

## Helium Gas For Airships

Dr. Hugo Eckener Will Use Helium Gas and Crude Oil Motors In New Zeppelin

Berlin, Germany.—Dr. Hugo Eckener surprised the annual dinner of the American Chamber of Commerce here by announcing that as a result of the recent disaster to the British dirigible R-101 he had changed the plans for Zeppelins now under construction so as to provide for helium gas and crude oil motors.

He said he had received word from the United States that helium gas, which is non-inflammable and non-explosive, would be available to inflate his airships in whatever quantities desired.

Dr. Eckener, who is world famous as commander of the Graf Zeppelin, declared that had it not been for an explosion the crash of the R-101 in France several weeks ago would have resulted in minimum damages. As it was the great airship burned to almost nothing and 48 British lives were lost.

## Brazil Establishes Provisional Government

Reforms and Democratic Elections Promised By Brazilians

Rio De Janeiro, Brazil.—The Brazilian Government, of which Dr. Getulio Vargas has become the head as the victor in a brief revolution, plans to step out as soon as it has effected reforms and democratic elections will then be conducted.

This was the assurance of Dr. Osvaldo Aranha, associate of Vargas and just named Minister of the Interior and Justice in the temporary government, who told the Associated Press that the new administration will represent the will of the Brazilian people.

"We have established a provisional government similar to that when the republic was proclaimed in 1889," he continued. "We shall shape our programme with the idea of making a real representative government and bringing honest administration into all departments."

## Earnings Forty Millions Less

C.N.R. Has Deficit This Year Of Ten Million

Toronto, Ont.—Gross earnings of the Canadian National Railways system will be \$40,000,000 less this year than in 1929, but drastic economies in all departments of operation and in capital expenditure will offset this to the extent of about \$30,000,000, it was revealed here by Sir Henry Thornton, president of the system.

The large savings effected, he indicated, were largely achieved by putting off construction work and other non-essential expenditures.

While no improvement or indication of immediate improvement in C.N.R. earnings was visible, Sir Henry was encouraged at what he thought was a "better feeling" by most people and business men. The extreme and unwarranted pessimism induced by the depression, he thought, was passing rapidly, which was a good sign.

## NATIONAL FARM POLICY MAY NOW BE FORMULATED

Ottawa, Ont.—New departures in Canadian methods of agriculture are expected to develop from a conference to be held here November 17 and 18 between Hon. Robert Weir, Minister of Agriculture, and Ministers of Agriculture of the various provinces. The conference has been called in the hope of formulating a national agricultural policy.

Not only will the views of the provincial ministers be presented at the conference, but suggestions from the various agricultural colleges will also be put forward. Major Weir has already been in communication with deans of colleges throughout Canada, inviting them to express their opinions.

The discouragement suffered by farmers in attempting to market their crops at reasonable prices has confirmed the minister in his determination to evolve an effective national agricultural policy, according to department officials. While the most crucial phases of the problem are present in the western provinces, the conference will not concentrate on the wheat situation alone, it is understood, but will endeavor to bring forth a policy of benefit to the country as a whole.

Major Weir has not made an expression of his own views, but is believed to favor a gradual increase in cattle-raising in the western provinces.

## MIGHT WEAKEN ONE OF THE FEW LINKS OF EMPIRE

London, England.—The Times recently discussed appointment of governors-general, one of the matters which has received consideration of the Imperial Conference, and concluded that one of the few remaining formal links binding the Empire would be severed or at least weakened, if governors-general were to become merely nominees of the reigning governments in the dominions.

"It is not easy to see how such a nominee could adequately discharge the function of the office as set forth in the report of the 1926 Imperial Conference," the Times said. "Nothing could be more erroneous than the apparent impression in some dominions that the governor-general is merely a lay figure. If the governor-general is to represent His Majesty adequately, then His Majesty's part in the appointment must be real and not merely nominal. This is all the more necessary since the governor-general is now exclusively the representative of His Majesty."

"At the same time it does not follow that a dominion government should surrender the voice in selection which they have had for a good many years."

Concerning the discussion on whether a governor-general should be a citizen of the dominion in which he holds his office, the Times said it did not see why any class should be ruled out from the area of choice. But other things being equal, a governor-general would find it easier to discharge his duties if he came from another part of the Empire, free from local associations and prepossessions. The whole matter, concluded the Times, is one for informal consultation and general agreement, not for any pedantic formula.

## Grade Crossing Fund

Half a Million Dollars Are Appropriated For This Purpose

Ottawa, Ont.—Transfer of \$500,000 from the government unemployment fund to the grade crossing fund has been authorized by order-in-council. The latter fund is administered by the Railway Commission. The transfer is made by the government with a view to assisting in projects for establishment of necessary grade separations at a time when employment is urgently needed.

The government makes a regular annual contribution to the grade crossing fund, but the amount transferred is in addition to that annual grant.

## Will Investigate Deportations

All Future Cases Will Be Carefully Considered On Merits

Blind River, Ont.—Further deportations to their native lands of patients confined to mental institutions in the province will not be authorized until every case has been carefully considered on its merits and passed upon following a thorough examination by a competent physician.

This policy will be followed by the Ontario Government in dealing with such cases in future, according to Hon. J. M. Robb, provincial minister of health, in discussing the cases of three women recently to come under the deportation order.

## Alberta Cattle For Britain

Second Consignment Has Been Shipped From Calgary To Manchester, England

Calgary, Alberta.—A shipment of two, three and four-year-old steers, numbering 205 head, have left here for Montreal, from which port they are billed for Manchester, England. The consignment, second of its kind to leave the west during the past few weeks, was collected and is being shipped under supervision of the Dominion Department of Agriculture. It will serve to further prove the possibilities of the British market for western ranchmen.

## Section Foreman Awarded Prize

Winnipeg, Man.—E. Swanson, section foreman in charge of one of the British Columbia boundary subdivisions at Eloit, B.C., has been awarded the prize donated by W. M. Neal, Winnipeg, general manager western lines Canadian Pacific Railway, for the best maintained section of track on the company's western lines during 1930.

Shanghai, China, plans to spend nearly \$4,000,000 on new municipal buildings.

Two trucks of shortbread and more coming up to complete the carload which left Winnipeg for Toronto's Christmas trade. It required 645 cases, 12,900 toothsome cakes, to fill the car with the western manufactured product bound for eastern trade—a special order completed this month.

## Nothing Static About Canada

Premier Bennett, Speaking Before British Association, Says Pioneer Spirit Still Prevails.

"The Dominion of Canada, with less than ten million inhabitants, is yet the fifth largest trading country in the world and it has achieved this position largely because our people represent a happy combination of two great races," Mr. Bennett, Canadian Prime Minister, told a gathering at the Canada Club in London, England.

Hon. W. C. Nizon, agent-general for Ontario, presided and Premier Bennett was the principal speaker. On the Premier's left were General Lord Byng of Vinny, former Canadian Governor-General, and the company included Premier G. W. Forbes, of New Zealand; Sir Richard Squires, Premier of Newfoundland; Patrick McGilligan, Free State Minister; Field Marshal Lord Alibony, Field Marshal Sir George Milne, the Earl of Cromer, Viscount Dunsinville and many others prominent in British life.

The health of the Canadian Prime Minister was proposed by Sir William Jowett, Attorney-General, who spoke on behalf of Prime Minister MacDonald, who appeared later in the evening.

Mr. Bennett, in opening his remarks, drew loud cheers when he spoke of his pride and pleasure in finding next to him Lord Byng.

"The pioneer spirit prevails still," declared Mr. Bennett, speaking of the Canadian people. "But the building of Canada has not been easy. She has been next to a great neighbor which speaks the same language," said Mr. Bennett and he added, with a twinkle, "in the main," a remark which drew laughter.

"We have kept before us," said the premier, "an ideal in regard to our place in the British Empire and we have not faltered in our proud belief that to us is entrusted a great and solemn task of interpreting empire hopes and aspirations to our great neighbors to the south."

"No people stands still and there is nothing static about the economic life of Canada. We kept the faith built upon the great traditions of our fathers; we have created great facilities for the transaction of business, but we realize that the time has come when those invisible ties which bind together a quarter of the world's population should have some more tangible basis of strength and power than mere sentiment."

"I am not despondent," concluded Mr. Bennett, "neither am I depressed, for I am as confident as I am of anything in this world that the destiny of the British people will never be truly discharged until we have made our dream of co-operation come true."

The Duke of Connaught, former Governor-General, was in the audience, but the time has been at the dinner, but his highest seat a message regretting his inability to attend, expressing his cordial wishes to Mr. Bennett.

### Shipping Wheat To China

Large Quantity Of Canadian Wheat On Order For Export To Orient

A large quantity of Canadian wheat is on order for export to China during the coming winter, the market having been created largely through the meagreness of the rice crop as a result of the continuous fighting among the warring factions in China, said G. S. Moss, formerly Acting British Consul-General in the City of Canton, who is now on his way back to China following a holiday in England.

An Old Canadian Industry  
Canada's oil industry is an old industry. Early explorers made reference to the importance of the oil they carried on by the Indians.

A sheep's wool grows fastest and coarsest in summer and autumn, and slowest and finest in winter.

Prisoner: "So they have put in some bars—at least, nobody can get in and steal anything during the night."—Pages Gates, Yverdon.

W. N. U. 1863

## Record For Reaping Machine

In Good Order After About Forty Years Use

Mr. William Dunn of Hiltor Beach, Ontario, has a reaper he thinks about 40 years old. When he dropped into the Star office he told about it, and was as proud of the machine as a man could be. Of course, Mr. Dunn is an unusual man, because if he were not he would not now have the original palst on his reaper, and a repair palst for the machine of less than one dollar for the whole of the time he has owned it. He never leaves the reaper out in the weather, and he believes in constant oiling.

An interesting feature of the story is that it was a second-hand machine. Mr. Dunn buying it in 1905 from a farmer named Thompson, who had used it eight or ten years. Mr. Dunn has used it on his farm since 1905, besides cutting hay for his neighbors, and in all that time has needed only a new tooth for the reaper, he having broken one by forgetting to insert the pin which held the tooth. "It is all intact and in good working order, and if it had a new knife it would be as good as new," said Mr. Dunn, who thinks there is not another reaper in Canada that has such a record, "and probably not in the world."—Bait Star, Marie Star.

## Requires Plenty Of Water

Figures Show Each Bushel Of Wheat Needs Eighty Tons For Growth

How much water does it take to grow a bushel of wheat? When someone asked us this question we answered fifty gallon, thinking that would be a liberal estimate. Then we were told to work it out and see for ourselves how silly our answer was. Well, we have worked it out and we admit that we are somewhat staggered.

First, let's take a good wheat growing area. The area around Regina, Saskatchewan will do. On looking up meteorological records we find that the normal rain fall in this area is just under fifteen inches a year (translating the snow into rain). This means that on every acre of land of our technical newspapers tell us, 640 cubic feet of rain fell. Now a cubic foot of water (so the editors weighs 62 pounds. That means that 1,688 tons of water fell on each acre. The average yield of wheat in the Regina area in a ten year period was 21 bushels. Thus each bushel of wheat took 80 tons of water to grow.

## Trying New Method Of Packing Apples

Fruit From Okanagan Will Be In Cartons Like Eggs

British Columbia's great Okanagan apple crop in future will be shipped in cardboard cartons instead of the familiar wooden apple boxes used in the past, according to plans announced at the Provincial Department of Agriculture. Each apple will be placed in a separate cardboard compartment which will protect the fruit from damage and assure its arrival at its destination in good condition, it is stated.

It is believed apples under the new system will be as well protected as eggs in transit. This change will be a considerable blow to the lumber industry, which has sold great quantities of box shooks to the fruit industry. The cardboard industry, however, will benefit.

Canadian Arsenal  
All the white arsenic produced in Canada is made at Deloro, Ontario.

## LAND COMMISSIONER FOR C.N.R.

Q. G. Baird has been appointed

Land Commissioner for the Canadian National Railway, with headquarters at Winnipeg, succeeding E. A. Field, who retires from the position after a long and faithful service with the company. Succeeding Mr. Baird as Assistant Land Commissioner is O. S. Cloutier, who was collection manager in the Land Department.

Geoffrey Baird was born in Toronto in 1892, and it was in that city that he received his public and high school education. He joined the service of the Canadian National in 1911, starting in the Land and Townships Department at Winnipeg. In 1914 he was transferred to the land department audit office at Toronto, and, two years later, returned to the Winnipeg office. Following his return, he enlisted with the Royal Flying Corps and was mentioned in dispatches on several occasions. He rejoined the office of the land department of the Canadian National at Winnipeg in 1919, as collection manager, and, in 1923, was promoted to assistant land commissioner, which position he has held up to now.

Oron Samuel Baird was born at Hillsboro, N.D., in 1891. He came to Winnipeg in 1911, and enlisted during the war in the Royal Air Force. From 1919 to early in the next year he was accountant in the Canadian National Land Department, after which he resigned and, for four years, was secretary-treasurer of the Equitable Trust Company. He returned to the Canadian National service in 1924 as collection manager in the land department and held that position until now.

## Conquering Disease

Parasites That Literally Eat Up The Disease Germs

Discovery of an effective treatment for Asiatic cholera and dysentery by introduction of a parasite that literally eats up the disease germs is reported to the New York Academy of Medicine.

The new treatment is announced by Dr. Felix D'Herelle, professor of bacteriology at Yale, and the substance used is the still mysterious bacteriophage which D'Herelle himself discovered about six years ago.

Bacteriophage means literally "bacteria eater." There is a specific bacteriophage for each disease, and it develops in convalescing persons. He treated 10,000 cases of dysentery in Brazil and had only two failures, Dr. D'Herelle said.

Range Horses For Fox Farms  
Some 200 range horses from the Maple Creek district were shipped in railway cars the other day bound for Winnipeg—for the corral of the Prairie Fox Meat Company.

## Language Construction

Some Angles Of English Language Must Appear Difficult To Foreigners

In the course of correspondence in the "London Week-end Review," on nouns of assembly, the following article from an old newspaper was submitted. It was found in an old scrapbook: "The construction of the English language must appear most formidable to foreigners. One of them, looking at a picture of a number of vessels, said, 'See, what a flock of ships.' He was told that a flock of ships was called a fleet, and a fleet of sheep was called a flock. Also that a flock of girls was called a bevy, a bevy of wolves a pack, a pack of thieves a gang, a gang of angels a host, a host of potatoes a shoal, a shoal of buffaloes a herd, a herd of children a troop, a troop of partridges a covey, a covey of beauties a galaxy, a galaxy of ruffians a horde, a horde of rubbish a heap, a heap of oxen a drove, a drove of blackguards a mob, a mob of whales a school, a school of worshippers a congregation, a congregation of engineers a corps, a corps of robbers a band, a band of locusts a swarm, a swarm of people a crowd."

## When Youth Learns

Age Teaches and Then One Is No Longer Young

Education does not begin until one is 25 and continues until 85, if it ends at all, says a British novelist. Tell that to the sophisticated youth of the present, is there a flogger who does not think she knows infinitely more than her mother, and is there a cigarette youth who does not think he can teach his father? While the older may know better, youth holds to its fancied superiority.

As for the dilettante thousands, how dare even the boldest novelist question their education? Do not most of them nurse the illusion that they know all that is to be known? Age will teach them otherwise, but youth has to learn for itself. And when it has learned that its fancied wisdom was largely folly and that its imagined education was lacking in much of the real thing, it is no longer youth. That is the tragedy of it.

## Vancouver Grain Exports

Almost Three Times As Much Grain Shipped This Season As Last Year

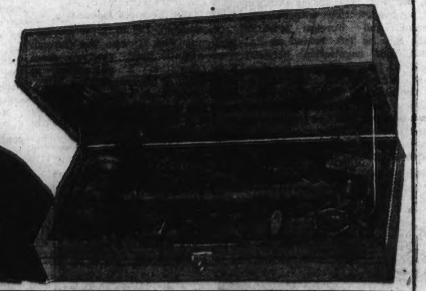

Exports of wheat from Vancouver for the crop year to October 9th totalled 8,499,276 bushels, or almost three times the amount shipped during the corresponding period of last year, according to the weekly statement of the Vancouver Merchants Exchange. Elevator stocks at the same date totalled 19,758,081 bushels with 1,441,000 bushels on route.

## What Nursing Cannot Cure

A man who suffered from a grievance and who could talk of little else was one day having a chat with a doctor. "I suppose your experience tells you it is possible to cure almost anything by careful nursing?" he asked. The doctor, who had a deep sense of humor, looked quickly at his questioner. "One thing can never be cured by nursing," he said emphatically. "What might that be?" "A grievance," said the doctor, with a laugh.

There are six hundred species of fish in the waters of Florida.

## Every Piece Tells Its Own Story

Following a tradition which began more than thirty years ago, H. H. Melanson, Assistant Vice-President of the Canadian National Railway, was presented with a historic gavel at the annual convention of the American Association of Passenger Traffic Officers, of which he is the 75th president. Every piece of wood in the gavel has its own story to tell of Mr. Melanson's career and of railway development. There is in it willow from the tree which grows in front of the house of Mr. Melanson's father in France; a piece of an apple tree from Acadia; a piece of wood from the school where Mr. Melanson made his first studies; a piece of the first deck he used when he joined the railway; pieces of steel from the "Samson" and "Albion," the first locomotives operated in the Maritime Provinces; a piece of lumber from Mr. Melanson's first private car, No. 34, of the Intercolonial Railway, and a piece of hickory from the woods along the Canadian National Lines in the States of Michigan. In Bonanza Creek, Yukon, gathered in '98; jade from New Zealand; Cosman's Marbles, the first gem stones from Scotland; opal from Australia, and a piece of metal from the last sleeping car built by the Pullman Company in the United States.

## Management Of Farms

Must Be Learned Resources and Ingenuity

It is one of the anomalies of the times that after a hundred years of farming experience in Canada we must learn how to farm.

It is idle to say that there have not been periods in the past when farming in Canada was moderately profitable. We have come through cycles, one after another, when agriculture was on the crest of the wave and then in the trough. We expect agriculture will enjoy periods of good times in the future, but how to meet expenses, pay the taxes and make a profit now—that is the problem.

The problem can be approached from several angles, but in the end the farmer has to fall back on his own resources and his own ingenuity. That means self help in best, and better farming is the surest solution.

Recently a party of agricultural engineers and agricultural economists from the Province of Manitoba and Saskatchewan and the State of Minnesota, North and South Dakota, and Montana made a tour of the great wheat growing belt north and south of the International line. They saw much and learned much; they found people in distress, in moderately good circumstances and some quite contented even under present conditions.

South of the border they found men who said they could produce wheat and make a living at present wheat prices. Within 30 miles of Regina the party interviewed two large scale farmers who were satisfied that they could produce wheat at a profit at present price levels. Most of these optimistic farmers were operating on a large scale, but experience has shown that the small scale, careful producer can do just about as well as his big brother when the same amount of thought and attention is given to the problem.

In Eastern Canada we are not wheat conscious. We are live stock minded, growers of fruit, vegetables, cash crops and a great variety of farm products. It is not so easy, where mixed farming is practised and cash crops grown, to determine the costs, for yields and markets vary tremendously from one year to another, even in normal times. Prices we hope have dropped to rock bottom this year and will now ascend, but if farm practice and farm economy can be so adjusted as to keep from going further into debt, in these times, one will certainly profit by the better management when markets strengthen and fair prices are restored.

Present conditions are demonstrating how essential is a knowledge not only of the best production methods, but of the economies of farming and of the best marketing methods. Our agricultural colleges and departments of agriculture might well devote more attention to farm management and marketing. After all, it is a matter of finding out how the most successful farmers conduct their business and adapting these methods to similar types of farming.—Farmer's Advocate.

## Figures For Hay Shrinkage

For Cattle Feeds Fairly Accurate If Cured Under Ordinary Conditions

The question is frequently asked as to what extent hay under ordinary circumstances undergoes shrinkage in the mow. In other words if you have 100 tons of hay in the mow during the past summer how much have you got to feed out this winter, or sell, on an actual tonnage basis.

While the amount of shrink depends to some extent on the conditions under which the hay is stored, the following figures can be used with fair exactitude for hay cured under ordinary conditions. Alfalfa hay will commonly shrink about fourteen per cent. in the mow. Red clover runs in the neighborhood of twenty-four per cent. or about ten per cent. more than alfalfa. Timothy shrinks about seventeen per cent. under average conditions and a mixture of timothy and red clover will shrink about twenty per cent.

If the hay is put in the mow a little on the damp side and swayed to a considerable extent in the mow, the shrink will be somewhat greater and, correspondingly, exceptionally well dried hay will have a lower shrinkage. The figures given above, however, will be found a fairly accurate guide for estimating hay in the mow if the approximate tonnage stored is known.

First Lawyer: "Did his speech carry conviction?"

Second Lawyer: "It did! His client got five years!"

Be an optimist and lay up a little sunshine for a cloudy day.

Money talks—and it will also stop talk.

The builder's workman at home—Boudganisse-Sirix, Stockholm.

## Better Poultry

Movement To Introduce Poultry Grading For the Coming Season

The people of Canada will get better poultry this season than ever before. That promise is held out as the result of a nation-wide movement to introduce poultry grading for the present poultry season.

Canada's poultry season extends roughly from October 30 to the New Year. During that time approximately 15,000,000 chickens and other fowl will be marketed in this country in addition to the turkeys, geese, ducks, etc. The average weight of the chickens will be about four pounds.

The grading movement is sponsored by the egg and marketing service in the Department of Agriculture, and the packers and others handling poultry in a big way have agreed to pay according to grade. The movement will really get under way from Toronto, where livestock and departmental officials will be in conference. All poultry will be divided into two main grades, "milk fed" and "select." "Milk fed" does not necessarily mean that the birds get milk to drink. It means that they have been crated fed until their muscles have been softened and the fat takes on a milk-white color. The selected are range fed, with more athletic muscles.

The two grades will be subdivided into several classes, and the buyers will pay a differential of 4 cents a pound in favor of the milk-fed class. It will mean that the farmer who feeds his poultry, that is, crated feeds them, will get a substantial margin over the one who lets his stock run at large. With the present price of feed, it is estimated that the milk-fed bird will be a profitable undertaking.

The poultry standard will be voluntary, but not only will it include chickens but will apply also to turkeys.

Several systems of marketing are in use in Canada. In Western Canada, poultry pools and commercial firms compete in handling the business. A similar situation will prevail in Western Ontario and in Quebec, the Maritime Co-Operative Exchange is a big factor down east while in Prince Edward Island which in the past has marketed the best poultry, co-operative selling will be a big factor.

The Agriculture Department will furnish experts to actually grade the birds in some cases and in others will have inspectors who will supervise commercial graders. Each bird will be labelled.

## Weeds Described

Bulletin Provides Complete Description Of Weeds Common To Canadian Agriculture

"Weeds and Weed Seeds" is the title of Bulletin 137, New Series, which has just been received from the King's Printer for distribution. Prepared by technical experts in the seed branch of the Dominion Department of Agriculture it provides a complete description, with illustrations, of the weeds common to Canadian agriculture, and provides complete information with respect to the characteristics of weeds, also methods for their control and eradication. The bulletin is essentially practical in the treatment of one of the most pressing of modern farm problems and is one which should be in the hands of every farmer in Canada. It may be obtained free of charge on application to the Publications Branch of the Department at Ottawa.

## Safest in New Zealand

Country Has Broken Its Record For Lowest Infant Mortality Rate

New Zealand is the safest place in the world to be born, according to Labor Department Statistics, Washington.

The children's bureau of the department reported that New Zealand has broken its own record for the lowest infant mortality rate in the world by a new low of 34 deaths for every 1,000 live births in 1929, just half the infant death rate in the United States.

## Marketing Grain Through Livestock Production Will Solve Problem Of Western Farmer

Whether to sell grains through livestock or for cash has been a question much discussed in the past. The question of the effect of concentration production on the sale of grain for cash has now been pretty well settled. What about selling them through livestock? Particularly attractive features about selling grain for cash have been the relatively low amount of labor and skill involved and the rapidity with which the cash could be secured. But this latter advantage has disappeared and now it is a question of whether we shall do the work and learn the skill.

Attaining skill costs money, but it should not be charged into costs of producing, say, hogs. It is an investment which will always return big interest. It is largely a matter of will and intelligence.

Many farmers can feed considerable numbers of livestock without increasing the amount of money ac-

count of hogs should not exceed 500 lb. to each 100 lb. of hog produced. Under reasonably good management the quantity should not exceed 450 lb. Where, as in the East, milk supplements are available, 100 pounds of hog are being produced by many farmers with the equal, including the milk, of 400 lb. of grain, while some men with very good breeding stock and skilful feeding are using even less. This is where one (but only one) of the big features of cost of production comes in. Such results are the reward of a steady policy persistently carried out over the years.

The farmer who has steadily added to his equipment and skill in this year not worrying about the low price of grain. Rather he is benefiting by it. Even in the year of the highest priced grain he still has averaged a fair margin over grain prices. Sometimes it is necessary to feed hogs for returns that do not exceed the cash

### Largest Turkey Ranch

Alberta Farm Woman Makes \$10,000 This Year In Raising Turkeys

Nine years ago, Mrs. W. A. Freeman, of Ardenode, Alberta, a native of Wisconsin, U.S.A., won a pair of bronze turkeys in a raffle. She now has the largest turkey ranch in Canada and is the acknowledged queen of turkey raising in the Dominion. Her turkeys will return a revenue of \$10,000 this year.

The winning of the pair of turkeys in the raffle suggested to Mrs. Freeman the idea of raising turkeys as a side line. She applied to the Canadian Federal and Alberta Departments of Agriculture for literature on raising poultry, turkeys in particular. Her husband, a farmer, encouraged her to experiment in the business. She studied the literature carefully and followed the advice given. Her ranch is now famous. She receives letters from all parts of the North American continent and to other countries.

This year she has raised 2,500 birds. Three hundred hens, all government inspected, have supplied the demand for eggs in 1930 and 45 of the most perfect hens have been selected for first-class breeding stock. A revenue of \$2,000 has already been obtained this year from the sale of eggs, and \$2,000 from the breeding stock. The receipts from the sale of table birds for Thanksgiving and Christmas are expected to bring this year's total up to \$10,000.

The Freeman farm on which the turkeys are raised has a creek running through it, which supplies a constant and plentiful supply of good water, an essential for successful turkey raising. The soil is sandy, which assures good drainage. Most of the chicks are hatched in incubators. After hatching the chicks are sheltered for about 10 days in large coops and then allowed to roam. The main flock is kept on about 300 acres of land, fenced in. Scrupulous attention is paid to the cleanliness of the sheds, roosts, etc., which are sprayed with single oil from time to time, to destroy fleas, lice, etc.

Mrs. Freeman believes that any woman on the farm prepared to give the necessary care and attention can meet with an equal measure of success in the business. Next year she plans to raise 5,000 birds for eating, and her total revenue will likely be about \$15,000.

### SCHOOL GIRL SMARTNESS EXPRESSED IN NEW CREPE YOK-LEEN WITH BECOMING FLARE

It's one of the most effective interpretations of the season in Paton's dark green crepe woolen in a shadow check pattern.

A narrow belt with green enamel buckle places emphasis on the natural waistline.

The scalloped neckline is smart, agreeing with the scalloped line of the shoulder yoke. The skirt is circular with just enough fullness to make it gracefully comfortable for school days.

Style No. 907 is designed for the sizes of 8, 10, 12 and 14 years. Brown and white twed of light-weight texture is very fashionable in a tiny checked pattern.

Wool challis prints, wool jersey, rayon novelties, covert cloth, linen, cotton broadcloth prints and tweed like colors are very smart for classroom and sturdy as well.

Size 8 requires 2 1/2 yards 36-inch. Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your full name and address, the number of the pattern and the size you want.

### How To Order Patterns

Town .....

### Manitoba University

The University of Manitoba, at present situated in the heart of Winnipeg, is to move to the outskirts of the city on the site of the Manitoba Agricultural College, five miles south of Winnipeg. Work has begun on the erection of a new arts building to cost over \$416,000. The Agricultural College buildings are an imposing pile, representing an expenditure of \$4,000,000.

### CANADIAN HOTELS ASSOCIATION

Provincial directors and officials of the Canadian Hotels Association photographed at the Royal Alexandra Hotel following an annual meeting at which representatives from all parts of the Dominion were in attendance. From left to right they are: H. C. Brown, Charlottetown; C. A. Tanner, managing director and secretary-treasurer; Wm. Champ, Regina, president of the Saskatchewan Association; Mayor Ralph Webb, of Winnipeg, who founded the Canadian Hotels Association; George Skinner, Winnipeg; Manitoba director; B. S. Stacey, New Brunswick; Inset, is E. A. Nadeau, president of the Royal York Hotel, Toronto, who was appointed president of the association for the coming season.

## Fifth Biennial Conference Of British Empire Service League To Be Held In Canada In 1931

### Growth Of Prairie Provinces

Alberta and Saskatchewan Have Made Great Strides Since Provinces Were Created In 1905

It is just 25 years since the provinces of Alberta and Saskatchewan were created. At that time the population of Alberta was 185,000. It is now about 650,000. Saskatchewan in 1905 had a population of 185,000; now it is about 567,000. The total area under cultivation in Alberta 25 years ago was 660,000 acres; in Saskatchewan 2,000,000 acres. In 1930 Alberta had 15,000,000 under crop, and Saskatchewan 30,000,000 acres. The dairy production of Alberta has advanced in value from \$2,000,000 in 1905 to over \$20,000,000 this year. Similar progress in dairying has been made in Saskatchewan.

Progress has been equally as notable in a number of other directions in each of the two provinces. In 1905 there was comparatively no manufacturing in either Alberta or Saskatchewan, now the value of the annual industrial output is over \$150,000,000 of which Alberta accounts for \$100,000,000 and Saskatchewan \$50,000,000. Each of the two provinces has a well equipped university, several high schools and many hundreds of public schools. From more frontier towns of 25 years ago, Calgary, Edmonton, Lethbridge, Medicine Hat, Regina, Saskatoon, Moose Jaw and other places have grown into well established and beautiful cities, with every advantage found in any of the older cities of the new or old world.

These two provinces, the youngest of the nine that form the Dominion of Canada, have certainly acquitted themselves well since their admission into the family group a brief 25 years ago.

### South African Wheat Pool

Formed With The Object Of Organizing The Wheat Industry

A wheat pool for South Africa has been established with headquarters in Capetown, according to advice received by the Department of Trade and Commerce, Ottawa. The new wheat pool was organized as a result of a meeting in Pretoria recently of representatives of the Transvaal Free State, Eastern Province and Western Province.

The organization will be registered under the Co-Operative act, and is the culmination of deliberations of a committee appointed at the farmers' conference in January, with the object of organizing the wheat industry. The object of the scheme is to stabilize prices so that ultimately South Africa will produce sufficient wheat to meet its own demands. Millers of the country are reported to be in unanimous agreement with the project. The price paid for wheat will be according to grade, calculated more or less on value of Australian wheat, and prices will be established towards December in accordance with ruling world prices.

It is considered, according to the report received, that there will be no danger that the stabilization of the price of wheat will affect the price of bread as it requires at least eight shillings a bag for wheat before the price of bread will be increased and this is not considered likely to occur.

### Representatives of all the returned soldier organizations of the Empire will meet in Canada next August, when the fifth biennial conference of the British Empire Service League will be held. It was announced at Ottawa, by Lieut.-Col. L. R. LaFleche, Dominion president of the Canadian Legion.

Led by Earl Jellicoe, admiral of the fleet and presiding officer of the league, delegates will come from the British Isles, South Africa, Australia, New Zealand, and from every corner of the far-flung Empire.

In making the announcement, Col. LaFleche said the only definite plan was that the meetings would be held at such a time and in such cities as to permit the whole delegation taking part in the Warrior Day celebration of the Canadian National Exhibition at Toronto.

When the last biennial conference of the British Empire Service League was held in London, England, in 1929, Canada sought the next gathering. There was competition for this honor from other Dominions and a decision was withheld. Col. LaFleche has now received a cablegram announcing Canada's invitation had been accepted. Earl Jellicoe presided at the meeting in London, England, which made the decision.

At the London conference 23 countries in the Empire were represented and it is expected there will be at least that number that will send delegates to next year's gathering. The British Empire Service League is an organization of returned veterans, branches of which are in every part of the Empire. The Canadian branch goes under the name of the Canadian Legion. The conference will be the largest gathering of returned soldiers ever held in Canada.

Definite arrangements for the event will not be announced for some time, Col. LaFleche said. More or less tentative plans were made when the invitation was extended in 1929, but they now will have to be changed in some respects because of intervening events.

### How Time Is Spent

Frenchman Has Been Investigating and Gives Some Interesting Figures

A Frenchman with a liking for curious figures has been counting up the time that a man ordinarily devotes to common occupations of life. He finds that a man of seventy has usually spent about fifteen years working, twenty-three years in bed, nine years amusing himself or being amused, one year in church, and two years shaving himself. This last portion of time he seems to consider as one of the great wastes of life. But trying to imagine what we should look like if we all had heads we are not inclined to agree with him. Even if we did all save some time from shaving there isn't any real guarantee that we would put that time to any better use.

### A Great Bird Lover

The Duke of Rutland does not take so prominent a part in public life as some of his predecessors in the title, but he is keenly interested in agriculture and an ardent nature-lover, who cannot bear to see wild creatures especially birds, suffer. Once when abroad he found in a market place a big consignment of caged skylarks for sale. He bought the lot—about 800—and had them set free.

### New Air Mail Service

Announcement was made by the postmaster-general's department of the inauguration of a regular air mail service between Peace River and North Vermilion, Alberta. The route will be via Carajou and Fort Vermilion. No definite date for the first flight was made, but it will take place early in December.

"Madam, this sovereign is bad." "Bad? Impossible!" "No, my dear, I told you you would not get rid of bad money at this shop!"—Buen Humor, Madrid.

### Grain Values When Fed to Hogs

In the table below is shown the value of a bushel of wheat, barley, and oats when fed to hogs at the rate of 500 lb. of hog, 450 lb. of hog, and 375 lb. of hog, to produce 100 lb. of hog. For instance, in the first line of the table it will be seen that when hogs are selling at \$10 per 100 lb., when fed in the ratio of 5 lb. to make a pound of hog would have a resultant value to the farmer of \$1.20 a bushel, barley a value of 90 cents, and oats a value of 60 cents. The tables form a sort of conversion table or ready reference of values and are to be used in that manner.

When 500 lb. of Feed are used to produce 100 lb. of Hog.			
Hogs	Wheat	Barley	Oats
at	\$	\$	\$
10	1.20	.36	.68
10	1.08	.36	.61
8	.96	.76	.54
7	.84	.87	.47
6	.72	.77	.41

When 450 lb. of Feed are used to produce 100 lb. of Hog.			
Hogs	Wheat	Barley	Oats
at	\$	\$	\$
10	1.38	1.08	.75
10	1.26	.84	.68
8	1.08	.84	.61
7	.96	.84	.54
6	.84	.84	.47

When 375 lb. of Feed are used to produce 100 lb. of Hog.			
Hogs	Wheat	Barley	Oats
at	\$	\$	\$
10	1.60	1.20	.85
9	1.35	1.08	.75
8	1.20	.96	.68
7	1.05	.84	.61
6	.90	.72	.54

tually paid out for labor. The others must choose whether they will utilize a part of their labor in making the bushels of grain that they raise produce a better average income than they can get for them when cashed in as grain. Much of the idle time of farmers, especially in winter, can be well utilized in feeding livestock.

In the accompanying tables is given the value of a bushel of grain when fed to hogs. A range of prices for hogs is given and a range of quantities fed to produce a hundred pounds of pork. Two things stand out in these tables. One is that at a price as low as \$6.00 per 100 lbs. for hogs, which is lower than prices have been for many years, barley, oats and the poorer grades of Western wheat will still yield very good value in food per bushel. The other outstanding feature is that skill and management can largely increase the price per bushel received for grain when it is sold through hogs.

Under the worst conditions the feed

values of feed grains, but one thing that should stick into the minds of every person interested in the livestock industry is the utter foolishness of selling breeding stock because of a temporary condition.

It will be understood that while the accompanying tables give the feeding value per bushel of wheat, oats, and barley separately it is, of course, advisable to feed them mixed one with the other. A good ration for growing pigs would be equal weights of wheat, oats, and barley, and, for finishing, a bushel each of the same grains. Any one of the grains fed alone would not have its maximum value. Furthermore, the tables are not intended to be absolute, but are indicative of the values that may be obtained from grain when fed to hogs. In view of the price levels to which grain has been reduced they are emphatically suggestive of the wisdom of a policy that includes in its programme the steady, persistent maintenance of a considerable production of livestock on every grain farm.

### Revenue Dollar Cost

Larger Capital Investment Needed To Farm In Western Canada Than In The East

The Bureau of Statistics at Ottawa provides some interesting information with respect to the amount of capital investment in land, buildings, equipment and livestock it takes to earn a dollar of production revenue in Canada. Using the figures provided by the Bureau's estimates with respect to last year we find the investment cost of producing the revenue dollar by Provinces was:

Prince Edward Island	.....	\$3.88
Nova Scotia	.....	3.87
New Brunswick	.....	4.50
Quebec	.....	4.25
Ontario	.....	4.47
Manitoba	.....	5.24
Saskatchewan	.....	4.50
Alberta	.....	4.50
British Columbia	.....	4.54
Dominion Average	.....	4.78

It requires a larger capital investment to farm in Western Canada than in the East—Dominion Department of Agriculture.

### World Has Six Million Blind

Lewis H. Carris, of New York, managing director of the National Society for the Prevention of Blindness, in an address told the International Association that the world's blind population, numbering between 3,000,000 and 6,000,000, probably should be reduced to half that number within a generation by intensive scientific effort. The international body met at the Academy Palace with the president, Prof. de Peronne of Paris, presiding.

There should be no pessimism in a country with the advantages and possibilities which Canada possesses.

"Your autograph, please. You are the first man I have run down today."—Muskele, Vienna.

## ENOS FRUIT SALT

### Doctors Warn Against Drastic Purgatives

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENOS "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that it daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

## THE DUSTY HIGHWAY

— BY —

Copyright 1929

CHAPTER IV.—Continued.

"I believe," he said, turning with mock severity to Gay, "that you've been telling on me."

Simson Bartlett chuckled as he replied: "She ain't told nothing I didn't know beforehand. You've got a sort of conquerer's way about you. If you hadn't, do you believe this little gal would've picked up her duds and started off at a minute's notice?"

"It was thirty minutes," Nick corrected, "and she didn't keep me waiting either! Well, we must be off. A thousand thanks, Mr. Bartlett, for this happy week."

"Good luck!" called Simson Bartlett as they strode away.

And good luck had followed them. Through the whole summer, rain came during the night. With few exceptions their days were bright and sparkling. They struck off through picturesque New Hampshire, sleeping at farms when the chance came; often spending their nights beneath the stars; and once accepting the hospitality of a Gypsy camp.

September found them in Maine, reveling in those first beautiful days that only at night give a hint of the colder days to come. They had climbed what their hostess of the night before had called "a mountain," which, though hardly deserving the name, showed them a wonderful, wide stretch of creasing waves.

"I'd almost forgotten that I loved the sea," said Nick. "Gay! let's set sail for a warmer climate! There's money enough yet to take us South—or shall it be the big southwest we've dreamed about: Colorado, Arizona, New Mexico—deserts and mountains—canyons and waterfalls—California and the Pacific? Oh, my dear! isn't it glorious to be free?"

Free! It was then that fear clutched at the girl's heart. She was seated upon the ground, but Nick stood, his back to the wide expanse of blue, his hair blown away from his forehead, an open shirt revealing his strong young throat. As she looked up at him Gay thought that Simson Bartlett had been right—Nick had a conquerer's air about him. To think of shutting him up in that stuffy corner of the bank again seemed as cruel as clipping the wings of an eagle. Yet, she thought, with a quickening of her heart, even an eagle has its nest.

"Nick," she said, as he dropped beside her, "do—do you ever have the least, tiny desire to settle down?"

He smiled, and quoted:

"Who has not felt how sadly sweet  
The dream of home, the dream of home . . ."

"My dear girl, of course I think of settling down, as you provisionally put it; but not yet. We set out for the ends of the earth, if I remember rightly, and we've reached only the edge of the Atlantic! Settle down! Gay, are you crazy, or—Why, what's the matter?"

She looked up, bravely fighting back the tears, and said: "Nothing."

### Instant Relief!

## Corns

### Sore Foot Lumps

Nick. "—Then so softly he had to bend to hear: 'Nick dear—I can't go on.'"

"Can't go on! Have I tired you out—or—Oh, Gay!"

He knew, then. The knowledge came with a blinding sense of chaos. Wonder and dismay went hand in hand. New-stirring fatherly pride fought savagely with a sense of dull defeat. Then love triumphed over self, and he thought only of Gay—fear for—terror for what she was to go to—

His clasped hands lightened, and he pulled himself together to hear her say:

"You mustn't feel too bad about it, dear old boy. I—I've thought out everything. I'm going back, but you are to go on. No don't speak. I can't go back to Bakersville alone, Nick. That would be too hard. But I can stay with Mr. Bartlett. He'd like to have me—show me I know I could give him pleasure. It—I won't be till spring, Nick, and perhaps by then you—"

—Oh, my dear," she broke off suddenly—"I should be so happy if I felt that you were happy! But you won't be satisfied unless you're free, Nick, and—"

"Free!" Nick tossed the word aside as impulsively as he had tossed his stick and bundle on that bright May morning. "Free! and you back there with that old man! He put his arms about her. 'What sort of freedom would it be, Gay, darling? What do you take me for? Do you think I haven't any natural instincts—that I can't be happy over this as well as you? What a goose you are! Have you been losing sleep because you were afraid to tell me that our wanderings are at an end?'"

He kissed her with a tenderness that brought her tears, even as she protested: "But it wasn't the reason for you, dear. There's no reason."

"There's the best of reasons," he insisted. "I tell you what, Gay" (he was, to all appearances, enthusiastic), "we'll go back by train and hire 'The Bird's Nest' of Mr. Bartlett. We'll stay there through October; then, if nothing more interesting turns up, there's the bank, you know, with a raise waiting for me whenever I want to claim it. John Maxwell told me so before I came away. As for the ends of the earth,—why worry about something that'll keep? We'll have it to look forward to, you know."

Through her tears Gay threw him a look of gratitude; but further arguments proved futile.

"No, I shan't leave you," Nick decreed soberly. "I should feel like a slacker. Dear, don't worry about my disappointment. Remember these glorious weeks we've had, and which we'll always have to remember and look back upon. We can't escape responsibilities forever."

"Nick," she hesitated, "I—I hate to be the one to bring them to you, Nick."

He smiled, and taking her handkerchief, dried her tears as if she were a child.

"There! you're not to cry another tear. As for those responsibilities, dear girl, I brought them on myself. I made you come with me. I didn't give you time to consider the possible complications. I didn't consider 'em myself. But do you imagine that I'd have things different now? Look back on the days we've had together—"

"Oh, Nick," she said, while comfort swept through her heart in a healing flood, "if I could know that you'd always feel so! But you've only begun to stretch your wings, and who knows how long it will be before you can roam again? Nick, promise me something—promise you'll tell me if the time comes when you feel you must have more freedom. I—I couldn't bear to think that you were tugging at your leash."

"I promise," Nick answered soberly, meeting her mood; then added with all the confidence of youth: "But the time won't come!"

Two days later an amazed and beaming Simson Bartlett, arose from a big rocker on his front porch, and greeted them with all the cordiality of a long-lost uncle.

"Jimmy Cricket! I was just wondering about you. Ain't had a card since you left Portland. Thought maybe you'd look the train for some fur-off port, or set sail for the Fiji Islands. And here you be, turnin' in my own front gate! Set down, ma'am. You're a sight for sore eyes, both o' you, but what is thunderation brings you back ahead o' time?"

Gay flushed, but Nick answered readily: "Only the time-worn and unquenchable desire for 'Home Sweet Home.' In other words, we want to hire your camp, and when cold weather drives us out we'll go back to Bakersville, and the stately portals of the First National Bank. May we have the cabin, Mr. Bartlett?"

"It ain't for rent—not at no price whatever; but you're welcome to use it long as you see fit. But first you got to visit with me a spell, and tell me all about your travels. I ain't had a thing interestin' happen since you left. Many's the evenin', ma'am, that I've set here thinkin' o' that chowder, and the good time you give me, to say nothin' of all them postcards you sent back, an' letters, too. I saved 'em all. They're in the lacquer box my great-uncle Ebenezer Bartlett brought from Japan. Don't hardly see how you got a chance to write 'em, ma'am."

"We usually manage to do the things we want to do," Gay answered, "and I wanted you to know what a wonderful time we were having."

"Don't regret your hasty bargain, then?" chuckled the old man.

"Not yet," said Gay, with a sweet, upward glance at Nick that was not lost upon their host.

And Nick's guarded Simson, his eyes twinkling, "Sorry you ain't wadin' in the Pacific, boy—or be you satisfied to come back to old New England?"

"I've never set foot out of New England yet," laughed Nick, "and some day I shall wade in the Pacific. As for being satisfied—you ask Gay if she's heard any complaints on my part."

(To Be Continued.)

## Guard the Children From Autumn Colds

The Fall is the most severe season of the year for colds—one day is warm, the next cold and wet, and unless the mother is on her guard, the little ones are seized with colds that may hang on all winter. Baby's Own Tablets are mother's best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose of the Tablets will prevent colds, or if it does come on suddenly, their prompt use will relieve the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Gulf Stream Steadily Shifting Westward

Famous Navigator Says It Is Approaching the United States

A famous navigator according to Joseph Elgie, English magazine writer, has said that the Gulf Stream is steadily shifting westward, leaving England and approaching the United States.

If this happens, New York is destined to have a climate almost semi-tropical, according to the navigator.

It has been said that this warm stream of water, running through the Atlantic from the Gulf of Mexico, gives England a much warmer climate than it would have without its influence. It is feared if the stream continues to shift England's winters will be much more severe and its summers much colder.

## Use Minard's Liniment For Toothache.

Canadians Greatest Radio Users

According to the president of the Radio Manufacturers' Association of Canada the per capita expenditure in the Dominion on radio sets is the highest in the world. In 1929 Canadians spent over \$50,000,000 on radios and equipment.

## DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching from sour and acid? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the acids. Sweeten the sour and acid stomach, reduce the gas and encourage digestion. The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disorders and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c box of Carter's Little Liver Pills.

## Sore throats Need Double Treatment

Vicks' double action (inhalant and absorbed) brings relief

## VICKS' VAPORUB

OVER 25 MILLION JARS USED YEARLY

## Substitute For Spectacles

Small Lenses Fitted Under Eyelids Adopted By London Opticians

The wearing of spectacles may be dispensed with as a result of a remarkable optical device which is now being adopted for the correction of certain forms of defective vision.

The method of treatment, states the London Sunday Express, consists of fitting under the eyelids minutely thin lenses, similar in shape to the shell type of artificial eye.

The wearer can remove or replace the lens by means of a mirror in a second or so.

The new system is rapidly gaining favor among eye-specialists. A noted actress is playing nightly on the London stage with one eye fitted with one of the invisible substitutes for glasses.

The device is said to be particularly valuable to motorists and sport devotees, because it permits of a range of accurate vision at all angles while the efficacy of spectacles is limited to a direct view.

"These new lenses mark a great advance in optical technique," said a Harley Street eye-specialist. "The International Congress of Ophthalmology has investigated and approved the claims made for the discovery."

The use of these invisible substitutes for spectacles is already much more common than the public suspect. I have worn one for six months. I remove it every night and reinsert it in the morning.

"These lenses will certainly mean a great diminution in the number of people doomed to wear spectacles; but I should not go so far as to say that they will mean the complete elimination of spectacles from the stock-in-trade of the oculist."

## Free Freight Policy

Westerners Can Ship Breeding Stock Free of Freight Charges Under Certain Conditions

Major the Honorable Robert Weir, Federal Minister of Agriculture, has announced a new free freight policy whereby breeders available for breeding stock bought by bona fide farmers and cattlemen at stockyards west of Fort William will be returned to the buyer's farm or ranch freight free. Application should be made to the nearest stockyard for the benefit of the policy.

The concession extends to carloads of not less than twenty heifers to be used for breeding purposes only, to be so far as possible, of the same type and breed and to be not more than twenty-four months old. Free freight is obtained on the certificate of the authorized stockyards representative of the Dominion Live Stock Branch at point of purchase. It entitles the shipper to have his car of breeding stock billed to his home station free of freight charges. The railway company assumes 25 per cent. of the freight and the Dominion Live Stock Branch the balance.

## Manitoba Public Works

The proposed Manitoba public works mentioned in the agreement between the Government of the province and of the Dominion, and which are to be got under way as soon as possible, have been unofficially estimated by engineers as involving a sum of \$5,000,000.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Extremator.

## Increases Elevator Capacity

The Alberta Wheat Pool has increased its storage capacity at the Pacific coast by a million bushels through the leasing of the terminal elevator at Victoria, owned by the Panama Pacific Grain Co. Ltd. The Alberta Pool now has on the Pacific coast storage capacity for over 9,000,000 bushels of grain.

## Montreal Largest Inland Port

It is expected that the improved ship channel in the River St. Lawrence as far as Montreal, giving a 26-foot depth for ocean liners, will be completed by 1934. This will enable liners of 20,000 tons gross to sail to Montreal, 1,000 miles from the Atlantic, the largest inland port in the world.

Minard's Liniment refreshes the scalp.

## March Of Science

Suggestion Is Made That There Are Foetus Too Formidable For Best Brains To Follow

Will the wonders of science never cease? The question was asked a long time ago, but it still leaps to the mind and even to the lips. When one reads of motion pictures of the circulation of the blood, of destructive

tion of red-blood cells by sleeping sickness germs, of the breaking of plants and of injections of measured amounts of fluid into cells so small that a pin point could destroy many of them at a thrust, one can only blink and wait for still more astonishing announcements. The greatest surprise which science could possibly spring would be the confession that it had no more surprises. And yet there remain feats too formidable even for science. It may show a microscopic bacteria dividing itself in two without any apparent harm, but it can't show the rule of reason meandering along tickler tape. It may show the movements of protoplasm through plant cells, but it doesn't so much as attempt to show the presence of logic in political speeches. And if it did show us these phenomena, we'd spoil the picture by suggesting that it wipe the dust off the microscope.—New York Evening Post.

## A Strange Contrast

Aviation Receiving Help But Railways In Former Years Were Hindered

The foresight which is being shown in the world of aviation contrasts strangely with the lack of vision which was shown when railways were at the same stage of development. The recent centenary celebrations of the opening of the first rail railway in the world—the Liverpool and Manchester—emphasized the progress which was made in those early days in spite of the bitter opposition.

Towns and cities joined in the general opposition. When the Great Western Railway was being built, the Bath authorities insisted that the line should run outside the city boundaries, with the result that the sharp curve there still checks all fast trains. A similar attitude was adopted by Bristol; hence, the main station there, besides being on the outskirts, is so situated that improvements are difficult.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

Low fares are causing many taxi drivers in Poland to quit business.

Some people have an excuse for everything except living.

## FLAVOR

## Little Helps For This Week

"O turn unto me, and have mercy upon me; give Thy strength unto Thy servant."—Psalms lxxviii. 16.

I come to Thee, O Lord, for strength and patience

To do Thy Will: Help me; O Father, in this world of duty

My place to fill.

It is so difficult to bear with patience and allowance the faults of others. It is very mistaken to think that the great occasions of life only demand religious feelings and principles; it is in the everyday petty annoyances, the constant call upon our charity, forbearance, and meekness, that we feel the constant want of some stronger and more powerful stimulant than the feeling of the moment to smooth down the rube of life, and make our existence one of peace and happiness.—Maria Hare.

Tornadoes almost always move from southwest to northwest.

Men are born, but husbands are made.

under the auspices of the Floral  
U. F. W. A. will be held at the East  
Community Hall on Friday, Nov.  
21st. Proceeds in aid of East  
Community Hall.

## W. I. Meeting

The Women's Institute will  
meet at the home of Mrs. Cal-  
houn on Thursday, Nov. 20th.  
Roll call—An amusing remark.  
Program—An exhibit of inex-  
pensive Christmas gifts. No gift  
must exceed one dollar in price.  
Prizes given for the best exhibit.  
Everyone cordially invited to  
attend.

Huser & Weber finished thresh-  
ing on Monday and are well pleased  
at getting finished before the  
storm on Tuesday. They had in  
2600 acres of wheat, oats and lar-  
ley and the wheat average 20 bush-  
els to the acre.

## With the Hunters

Bill Wood and Ed. Clarke  
returned on Sunday after a week's  
hunting trip some sixty miles  
west of town. Bill brought down  
a large moose with a set horn  
having a spread of 44 inches. With  
no snow at this time, and every-  
thing in the woods as dry as tinder,  
hunting was very difficult, and  
a hunter was lucky to get a shot  
at all, but from now on it will be  
just too bad for Mr. Moose.

Adam Cruickshank, Frank  
Brown, Ike and Charlie Greenizan  
spent several days last week  
game hunting out west of Olds,  
they returned home on Monday to  
await a fall of snow. With about  
three inches of snow on the level  
on Wednesday the party set out  
again for the hunting grounds.

## Card of Thanks

The C.W.L. wish to thank all  
those who in any way helped make  
their annual chicken supper and  
social evening a success, and also  
to thank the willing workers who  
disposed of the tickets for the  
raising; all of which has been  
greatly appreciated.

## Only One Million?

We were spending a few leisure  
minutes on Sunday afternoon list-  
ening in on the radio to Mr. Aber-  
nethy's discourse during which we  
heard the name of Crossfield over  
the air. Our ear's pricked up and  
we learned that some one from this  
district had donated 10 dollars to  
their funds, accompanied by a wish  
that someone would die and leave  
the Bible Institute a million dollars.  
We don't know about the dying  
part, but we know of others who  
would be glad to accept such a  
request.

Oiga, be sure to meet me at the  
East Community chicken supper  
and dance on November 21. We  
will have the bestest time we ever  
had—Oie.

## Inverlea News

Miss Gwen Clayton, Mrs. Wm.  
Cress and Mrs. Claude Deeks were  
joint hostesses on Saturday last,  
when they entertained at the home  
of Mrs. C. Deeks, honoring Miss  
Aline DeWitt, a popular bride elect  
of this month.

The tea table was presided over  
by Mrs. T. J. Borbridge, who poured  
tea from a beautiful silver tea-  
pot an heirloom of Miss Claytons  
which had been handed down in  
their family for over a century.

Mrs. Jack Clayton with a few  
well chosen words presented Miss  
DeWitt with a beautifully decorated  
basket full of lovely gifts, the  
opening of which caused much  
excitement, and at times merriment  
as the usual jokes were on display.  
Before the gifts were opened a

## Church of Ascension

Evening services will be held  
on November 16th, 23rd and 30th  
at 7:30 p.m.  
Holy Communion on November  
9th at 11:00 a.m. and on Novem-  
ber 23rd at 9 a.m.  
Matins on November 16th, at  
11:00 a.m.  
A. D. CURRIE, Priest-in-charge.

## NOTICE

On and after November  
6th my Coal Business  
will be conducted on a  
STRICTLY CASH basis.  
So do not ask for credit.  
IVOR LEWIS

very dainty buffet luncheon was  
served to over fifty guests, who all  
joined in singing "For she's a jolly  
good fellow" and wished Aline  
much happiness.

## O'Neil News

Mrs. Frank Ruddy and Mrs.  
Garnet O'Neil were joint hostesses  
recently, when they entertained  
at the latter's home in honor of  
Miss Annie O'Neil, another bride  
elect of this month.

Little Miss Hazel Ruddy and  
her sister Gladys made the presen-  
tation in the form of a huge three  
tiered wedding cake drawn on a  
little wagon. The little girls look-  
ed very sweet in green shot taff  
ette dresses.

After the opening of the parcel  
which contained many useful  
and pretty gifts, a very dainty luncheon  
was served to the many guests  
who all wished Miss O'Neil much  
happiness in her future life.

A card party and dance was  
held last Friday night at O'Neil  
school house in honor of Mr. and  
Mrs. Askew and family, who are  
moving from our district to live  
in the Thome place at Sampson-  
ton. Prizes were awarded to Mrs.  
Cap. Wigle and Mr. Earl Adams  
for cards. Everyone had a very  
enjoyable time.

## Meeting M. D. of Rosebud

The ninth meeting of the council  
of M. D. of Rosebud No. 280  
was held at the call of the Reeve  
in the municipal office in Crossfield  
on Nov. 8th.

The committee appointed to in-  
vestigate the damage claim of F.  
Stothart and disputed by W. J.  
Hunter, awarded Mrs. Stothart  
\$22.50. Mr. Hunter to pay all  
costs.

By-laws were read a third time  
passed, signed and sealed, granting  
seventy-five dollars to Carstairs  
School Fair and one hundred and  
fifty dollars to the S.A. Grace Hos-  
pital.

The council unanimously decided  
not to join or attend the Con-  
vention of the Alberta Municipal Dis-  
tricts Association.

The Reeve was empowered to  
arrange the Smith family affair as  
to care of children.

Secretary was instructed to find  
out what chance there would be to  
get a portable seed grain cleaning  
machine for this district.

Resolved, that Solicitor Dawson  
arrange for cancellation of title to  
the Crown of the Yule gravel pit  
when settlement is completed.
